EXPERIENCE

Learn Corporation (Largest education and learning solutions provider in Thailand) **July 2025 - Jan 2026**

Junior Data Engineer Contract

- Developed an Amortization System on Databricks using the Medallion Architecture (Bronze–Silver–Gold) to streamline multi-source data processing from Google Sheets, Big Query, and ERP systems.
- Developed, tested, and maintained production-grade ETL/ELT pipelines using PySpark and SQL, ensuring data accuracy, reliability, and scalability.
- Refactored 18 Tableau Prep dashboards into optimized SQL queries on Databricks Gold Layer, improving performance, data accuracy, and maintainability.
- Managed multiple workstreams concurrently, balancing pipeline development, production issue resolution, UAT support, and documentation delivery under tight timelines.
- Collaborated closely with analytics, finance, and business stakeholders to validate data outputs, resolve data quality issues, and align technical solutions with business requirements.

PROJECTS

Automated Vertebral Body Rotation Angle Measurement (Senior Project) **Jan 2025 - Apr 2025**

- Implemented a deep learning approach to determine vertebral body rotation angles from X-ray images, aiding scoliosis diagnosis
- Enhanced diagnostic precision by detecting spinal vertebrae and pedicles, then computing rotation angles to evaluate scoliosis severity

Skin Classification Application Project **Mar 2024 - Apr 2024**

- Developed a skin classification application using the Pylon model, capable of detecting facial skin issues through heatmap generation.
- Designed and implemented algorithms to enhance the accuracy and efficiency of facial problem detection.

House Price Prediction Project **Jan 2024**

- Performed data preprocessing, feature selection, and model tuning to improve accuracy
- Evaluated models such as Linear Regression, Decision Tree, Neural Network, and XGBoost, selecting the best performer based on RMSE and R^2 score

EDUCATION

Chulalongkorn University **July 2021 - June 2025**

- ***Bachelor of Science in Computer Science (2nd Class honors)***

SKILLS & INTERESTS

- **Language Skills:** English (TOEIC 820 - B2 level)
- **Soft Skills:** Problem Solving, Leadership and Teamwork, Communication, Agile Methodologies, Critical thinking, Logical & rational thinking
- **Hard Skills:** Java, JavaScript, HTML, CSS, SQL, R, Python, Scikit-Learn, Pandas, PySpark, PyTorch, TensorFlow, Matplotlib, OpenCV, BSRGAN, YOLO, Faster-RCNN, Roboflow
- **Frameworks & Tools:** Figma, Tableau, GitHub, Databricks, RapidMiner, VS code, IntelliJ, NetBeans
